

Design Specification Evaluation Rubric

Title Page			The title page identifies the name of the project and contains all of the required information (1)		The title page is missing required information (.5)	Missing section (0)
Project Overview	The Project Overview was an appropriate length while clearly stating what the project entails. (1)	The Project Overview was a good length while stating what the project entails. (.8)	The Project Overview was lengthy while somewhat stating what the project entails. (.6)	The Project Overview was long (or short) and went into more (or not enough) detail than needed about what the project entails (.4)	The Project Overview was overly long (or short) and went into too much (or too little) detail about what the project entails. (.2)	Missing section (0)
User Requirements	The User Requirements clearly identifies the goals of the project and the MVP states what project outcomes the project plans to achieve. (5)	The User Requirements are somewhat clear about the goals and outcomes the project plans to achieve. (4)	The User Requirements provides some insight on goals and/or outcomes of the project. (3)	The User Requirements are not clear as to the goals and/or outcomes of the project. The MVP is too vague or too general. (2)	The User Requirements of the project are not easily understood or no MVP is given. (1)	Missing section (0)
Design Choices	Several possible implementations were identified along with pros and cons were clearly stated. (5)	Several possible implementations were identified along with pros and cons and are somewhat clear. (4)	A few possible implementations were identified but limited pros and cons were listed. (3)	A couple of possible implementations were identified with vague insight (2)	Only one possible implementation was identified without any insight as to why. (1)	Missing section (0)

Design Selected	The selected design of the system, its components, and relations are clearly stated including an ERD, Architecture Diagram or Schema if required (5)	The selected design of the system, its components, and relations are stated including an ERD, Architecture Diagram or Schema if required (4)	The selected design of the system, its components, and relations are somewhat stated (3)	The selected design of the system, some components, and some relations are stated (2)	The selected design of the system, its components, and relations are vague or Missing (1)	Missing section (0)
User Interfaces /Interactions	The User Interface clearly identifies how the different users interact with the project along with appropriate visual aids (5)	The User Interface is somewhat clear about how the different users interact with the project along with reasonable visual aids (4)	The User Interface provides some insights on how the different users interact with the project lacking some visual aids (3)	The User Interface is not clear on how the different users interact with the project although missing several relevant visual aids. (2)	The User Interface is vague on the details of how the different users interact with the project although missing all visual aids (1)	Missing section (0)
Development / Deployment Environment	The environment requirements and reasons for them are clearly stated. (5)	The environment requirements and some reasoning for them are stated. (4)	The environment requirements and a reason for them are somewhat stated (3)	Some of the environment requirements and reason for them are stated (2)	The environment requirements and reason for them are vague or missing information. (1)	Missing section (0)
Test Plan				The specified tests were appropriate for the project. (1)	Some of the specified tests were appropriate for the project. (.5)	Missing section (0)

Timeline		The timeline demonstrates an appropriate understanding of the project and course tasks (1)		The timeline doesn't demonstrates an appropriate understanding of the project and course tasks (.5)		Missing section (0)
Bibliography					Has one (1)	Missing section (0)
Document Structure				The document is sectioned within the appropriate page limitation. (2)	Document is not sectioned or doesn't meet page limitation. (1)	Document is not sectioned and doesn't meet page limitation. (0)
